JASON VARGO

1056 Masonic Ave.
Albany, CA 94706

jvargo@gmail.com
404.906.9242

I am a senior research scientist with nearly two decades of experience leading interdisciplinary data science efforts that translate complex systems data into actionable policy and high-stakes digital infrastructure. My career is dedicated to communicating evidence for public benefit, ensuring that rigorous scientific research informs the health, equity, and resilience required for our collective flourishing.

Education

Doctorate of Philosophy, City and Regional Planning (2012)
Major field: Environmental Planning
Minor field: Environmental Health
Georgia Institute of Technology, Atlanta, Georgia
Dissertation: *Planning For The New Urban Climate: Interactions Of Local Environmental Planning And Regional Extreme Heat (http://bit.ly/2g2P45v)*

Master of City and Regional Planning (2009)
Specialization: Environmental Planning
Georgia Institute of Technology, Atlanta, Georgia

Master of Public Health (2009)
Global Environmental Health
Emory University, Atlanta, GA

Bachelor of Science & Engineering, Chemical Engineering (2001)
University of Michigan, Ann Arbor, MI

Professional Experience

Senior Researcher, *Federal Reserve Bank of San Francisco, San Francisco, California*.
2021-present

- Drove community development research for the Federal Reserve Bank's 12th District (9 western states), generating insights that informed policy and practice around critical issues like economic resilience, labor productivity, and household financial health for stakeholders across the region. Recent work includes forthcoming research on Ai and job augmentation, paralleling Anthropic's Economic Index.
- Spearheading the Community Engagement and Analysis Research Team's integration of Generative AI, semantic search, and agentic automation, significantly enhancing research efficiency and output quality.
- Designed and launched public-facing web applications that successfully disseminated complex data and research findings, bridging the gap between Bank research and actionable information for community-based organizations, bankers, nonprofits, and regulators.
- Contributed to a Bank-wide culture shift towards data-driven decision-making by serving three years on the Data+Analytics Community of Practice, facilitating broader engagement with and adoption of advanced data science and visualization tools.

COVID-19 Modeling Team Lead, *California Department of Public Health, Richmond, California*.
2020-2021

- Led the modeling team for COVID-19 in California, coordinating a diverse group of scientists across state research institutions to deliver near-real-time, high-stakes forecasts that bridged the gap between complex research and actionable public policy.
- Operationalized values as the scientific lead for the California Health Equity Metric, a first-of-its-kind policy instrument that translated the abstract value of equity into a precise, evaluative technical framework to protect vulnerable populations during California's economic reopening.
- Architected and served as Product Manager for CalCAT, an innovative model-ensembling data pipeline ("model of models") that integrated disparate scientific inputs into a single, reliable hub, redefining the state's approach to high-stakes technical infrastructure and digital delivery (https://calcat.covid19.ca.gov).
- Pioneered automated data science methodologies in R and Shiny that scaled the impact of the CalCAT platform to other states via open-source versions, demonstrating a commitment to building shared digital institutions for the public good.

Lead Research Scientist - Climate Change and Health Equity Program, *California Department of Public Health, Richmond, California*. 2017-2020

- Served as senior policy-oriented scientist in California State Government assigned to climate change and health equity, including the role that access to transportation and healthcare plays as a determining factor in an individual's health.
- Directed research projects with outside academics and research partners to study the impact of transportation policy on population health. This includes overseeing the work content of Research Scientist III, and understanding and analyzing large datasets of transportation and healthcare utilization in tandem.
- Tracked and inform progress of legislative and programmatic proposals affecting transportation policy and healthcare, as part of the California Climate Investments programs. Serve as an advisory voice to these investments and policies via collaboration with government stakeholders and advocates, as well as by drafting correspondence, comments, and position papers on the issues.
- Developed strategies to fund research at the nexus of health and transportation investment. As a member of the Steering Committee for the California Climate Change Research Program, I advise the Strategic Growth Council on the direction of a grant program awarding over $25M in 2018 for research.
- Participated in creation of a policy framework for the health implications of autonomous vehicle technology in 2018, involving multiple stakeholders from government, industry, academia, and advocacy groups.

Director, UniverCity Alliance, *University of Wisconsin-Madison, Madison, Wisconsin*. 2015-2017

- Initiated the UniverCity Alliance for the University of Wisconsin-Madison. Provided strategic direction for a new cross-campus endeavor focused on cities, committed to state-of-the-art research and service to the public through novel, diverse, cross-functional partnerships.
- Launched the UniverCity Year for the University of Wisconsin-Madison. Established and fostered connections to the UW Foundation to grow the program. Now entering its fourth year, it annually engages hundreds of students and faculty from across campus to work on sustainability projects with local government stakeholders.
- Served as the first Chair of the Educational Partnerships for Innovation in Communities-Network, an international network of higher education institutes with programs like UniverCity.

Associate Scientist, Global Health Institute & Nelson Institute for Environmental Studies, *University of Wisconsin-Madison, Madison, Wisconsin.* 2012-2015

- Led research on the intersections between transportation systems and global health. Brought together universities and governments in medium-sized Ethiopian cities to pursue sustainable transportation projects. Represented UW-Madison at international meetings including the Ethiopian National Climate Assessment and Wellcome Trust's Sustainable Healthy Urban Environments Workshop.
- Directed research and development of an upgrade to the US-version of the Integrated Health Impact Transport Model (ITHIM). Made and executed decisions on underlying assumptions, data standardization, and precision of the analysis based on policy relevance and potential impact.
- Executed major professional environmental public health research studies into pedestrian and cyclist safety with state and national sensitivity and policy impact.

Research Scientist, School of City and Regional Planning, *Georgia Institute of Technology, Atlanta*, *Georgia*. 2005-2012

- Assisted lead investigators at the Center for Geographic Information Systems, Center for Quality Growth and Regional Development, and the Urban Climate Lab on research design, data processing and analysis, grant writing, health impact assessment, and publication of scientific articles.
- Led data management and analysis for modeling of land cover change, future climate, and health impacts as part of a three-year study on climate change and health funded by the Centers for Disease Control and Prevention, including decisions on complex scientific problems.
- Pioneered curriculum for joint master's degrees in multiple disciplines urban planning and public health between Georgia Tech and Emory University.
- Calculated air quality health impacts for the health impact assessment (HIA) of Atlanta's largest redevelopment project, The Atlanta Beltline.
- Provided instruction to graduate students in different groups of disciplines, including engineering, architecture, planning and public health at Georgia State University, Georgia Institute of Technology, and Emory University through courses on Urban Environmental Planning, the Built Environment and Health, and Transportation and Land Use Interactions, as well as gave public presentations on related scientific research.
- Instructed and developed content for a Land Use and Transportation Interactions Course for civil engineering, urban planning, and public policy students.

Air Quality Specialist - Planner III, Office of Planning, Air Quality Branch, *Georgia Department of Transportation, Atlanta, Georgia*. 2004-2005

- Coordinated interagency efforts for promoting land use and transportation strategies to reduce traffic-related pollution.
- Recommended available research and best engineering and planning practices for estimating air quality benefits of transportation projects to regional government agencies.

Environmental Engineer, Akzo Nobel Coatings, Inc., *Louisville, Kentucky.* 2002-2004

- Served as in-house consultant on the health, safety, and environment team for a multinational Fortune 500 coatings company. Oversaw environmental compliance for international jurisdictions while streamlining management across facilities of various ages and technical capabilities in North America, Europe, and Asia.

Teaching

Instructor, California State University - East Bay, *Environmental Health*, Winter 2018, Spring 2018

Guest Lecture, University of Wisconsin-Madison, *PHS740/ENV740 Health Impact Assessment of Global Environmental Change*, Spring 2017

Guest Lecture, University of Wisconsin-Madison, *ENV401 Introduction to Air Quality,* Fall 2016

Instructor, University of Wisconsin-Madison, *PHS740/ENV740 Health Impact Assessment of Global Environmental Change*, Spring 2016

Guest Lecture, University of Wisconsin-Madison, *REST 765 Residential and Commercial Healthcare,* Spring 2016

Guest Lecture, University of Wisconsin-Madison, *ENV 213 Global Environmental Health: An Interdisciplinary Introduction*, Spring 2016

Guest Lecture, University of Wisconsin-Madison, *PA 611 Clinical Prevention & Community Health*, Spring 2016, 2015

Guest Lecture, University of Wisconsin-Madison, *LA 699 Designing Healthy Communities*, Spring 2016

Guest Lecture, University of Wisconsin-Madison, *PHS740/ENV740 Health Impact Assessment of Global Environmental Change*, Spring 2014

Instructor, Georgia Institute of Technology**,** *CP6213 Urban Environmental Planning*, Spring 2010, 2011

Instructor, Georgia Institute of Technology**,** *CP6213/EH584 The Built Environment and Public Health*, Fall 2010, 2011

Instructor, Georgia State University**,** *PH7340 The Built Environment and Health*, Spring 2011

Teaching Assistant, Georgia Institute of Technology**,** *CP6213 Urban Environmental Planning*, Spring 2009

Teaching Assistant, Georgia Institute of Technology**,** *CP6331 Land Use and Transportation Interactions*, Fall 2008
